PROJECTS

Auto Blogger   March 2025
- Designed and programmed a full-stack AI-powered blog automation platform using Next.js, and TypeScript. Integrated Google Gen AI to automate blog content and implemented JWT-based authentication with cookie-based secure user management. The structured database efficiently handles user and blog data. Engineered with ShadCN UI, SEO-optimized, and deployed on Vercel for scalability and performance. Showcases expertise in modern technologies and managing the full development lifecycle.

- Technologies: React, Next.js, TypeScript, Google Gen AI, ShadCN UI, JWT, Vercel.

Noted Cinema   November 2024
- Designed a responsive web app using the TMDB API, allowing users to explore movies with reviews, ratings, descriptions, and related content. Features include a rating system, review display, and intuitive design for seamless navigation. Built for scalability and cross-device compatibility. Established front-end and back-end, improved UI responsiveness, integrated TMDB API and implemented real-time interactions.

- Technologies: HTML, CSS, JavaScript, TMDB API.

KrishiCare   June 2024
- Developed a web app for farmers offering personalized teleconsultation services. Collaborated with a team of 10 to deliver a user-friendly platform, enabling expert advice access and peer connections to improve agricultural practices. Engineered a precise weather forecast system with 90-100% accuracy and crafted the project's logo.

- Technologies: Python (Backend), HTML, CSS, JavaScript (Frontend).

EXPERIENCE

Salesforce Developer   November 2024 - January 2025
SmartBridge   *Bhopal*

- Completed the internship, gaining expertise in Salesforce fundamentals, automation with flows, Apex, debugging, and Lightning Web Components. Built a CRM application to manage client and property related requirements.
- Earned three Trailhead Superbadges (Apex Specialist, Process Automation Specialist, Developer Super Set), demonstrating advanced skills in automation, coding, and implementing best practices in Salesforce development.

MERN Developer   August 2023 - November 2023
Ethnus   *Bhopal*

- Managed on multiple real-life projects based on MERN Stack with 100+ workhours, gaining practical experience in full-stack web development and Implemented 100% company-assigned projects within specified deadlines.
- Prototyped a comprehensive car rental platform featuring renting integration; resulting in increased sales. Technologies: HTML, CSS, JavaScript and MERN Stack.
